

The whole community will actively embrace that education is the key to everyone's success

FOCUS AREA	LITERACY	MATH	SOCIAL EMOTIONAL LEARNING (SEL) & ATTENDANCE
SCHOOL STRATEGIES	Kramer MS is focused on providing targeted reading support using small groups and helping build students ability to have rich academic conversations around their learning. Our school will collect and analyze data to increase student learning and achievement.	Kramer MS is focused on teaching students how to grapple with math concepts and use mathematical representations to better understand the concepts behind the content.	<p>SEL Kramer MS is focused on building meaningful relationships between adults and students to ensure a positive school and classroom environment.</p> <p>Attendance Kramer is focused on providing personalized and early outreach to students and families to increase school attendance based on data.</p>
EDUCATOR ACTION STEPS	<p>Educators will be observed on a regular basis and receive feedback around the execution of the lesson and the existence of rigorous learning.</p> <p>Kramer staff will engage in ongoing professional development focused on providing reading support and facilitating student-lead conversations about their learning.</p>	<p>The leadership team will observe teachers and look for evidence of rigorous student learning. Teachers will receive ongoing and effective feedback.</p> <p>Educators will review and analyze data on a regular basis to plan for interventions and reteach opportunities.</p>	<p>SEL The Kramer team identifies and aligns schoolwide practices and systems with Turn Around for Children.</p> <p>The social emotional team will develop a schedule to identify and monitor Advisory teachers acting as mentors and chief communicators.</p> <p>Attendance Analyze student attendance data on a weekly basis to identify students needing support.</p>
STUDENTS WILL	Students will deepen their understanding of difficult texts and strengthen their ability to have rich academic conversations about their learning.	Students will articulate their thinking and the concepts they are learning in math. Students will engage in conversations that show appropriate knowledge of math concepts and rigorous thinking.	Students will develop meaningful and deep relationships with their teachers and peers. They will understand the importance of coming to school and will improve their attendance.
